## ABOUT ME

Experienced and passionate software engineer, dedicated to harnessing my expertise in software development to create cutting-edge and resilient solutions. Proficient in QAD ERP (NetUI/WebUI/MfgPro), Progress 4GL, Bash, Typescript, Git, and SDLC methodologies. Beyond technical proficiency, I bring strong problem-solving abilities and interpersonal skills to the table, enabling me to thrive under pressure, meet stringent deadlines, and consistently surpass client expectations.

## EXPERIENCE

### Durvah IT Consulting Private Limited

May 2024 - Present

*Sr. Software Engineer*

Mumbai, India

- Delivered thorough QAD AUX training to team members and consistently supported team members with technical issues, promoting a collaborative atmosphere focused on sharing knowledge.
- Concurrently pursued advanced WebUI development training to stay ahead in technological advancements.

#### Key contributions in projects:

- Designed and developed customized business components with OOABL and Typescript for enhanced functionality.
- Successfully implemented the custom KPI and Action Center along with developing forms and views.
- Proficiently deployed various programs leveraging advanced tools like YAB and CVC, ensuring smooth implementation and seamless integration with existing systems.
- Designed and deployed multiple QRF programs leveraging Platform API to automate various transactions, resulting in a 60% reduction in manual effort and a substantial improvement in overall operational efficiency.
- Worked on the creation of OOABL Classes and Interfaces for QAD AUX App and performed the ant deployment in the environment.
- Executed development and integration workflows via SVN and provided technical support by troubleshooting Linux server issues.
- Led a team of developers, providing guidance, task allocation, and technical mentorship to ensure timely project delivery.

### Aliter Business Solutions Private Limited

Aug, 2021 - May, 2024

*QAD Technical Consultant*

Mumbai, India

- Developed maintenance programs using Progress 4GL, precisely incorporating essential lookups to streamline operations and bolster efficiency.
- Orchestrated the implementation of customized QRF designs and proxy programs, empowering businesses to conduct thorough data analysis and make informed decisions with precision.
- Innovatively developed NetUI browses, seamlessly integrating browse links and URLs while optimizing browse performance to elevate user experience to new heights.

- Designed and deployed CIM and upload programs, significantly reducing manual workload by an impressive 50-60% and enhancing overall operational efficiency.
- Spearheaded seamless migrations from 2012 to 2016, adeptly resolving runtime issues and seamlessly replicating existing customizations in the latest version for uninterrupted workflow.
- Proficiently deployed various programs utilizing advanced tools like CVC and YAB, ensuring smooth implementation and seamless integration with existing systems.
- Interacted proficiently with Linux environments, harnessing CLI tools to streamline processes and optimize system performance.
- Designed business components and extended them with OOABL extensions and platform API, concurrently pursuing WebUI development training to stay at the forefront of technological advancements.
- Implemented lookups, formulas in the business component, and alerts, while effectively managing data export/import operations to ensure data integrity and seamless flow of information.
- Provided comprehensive QAD technical training to junior team members and actively assisted teammates with technical support, fostering a collaborative and knowledge-sharing environment.
- Offered invaluable assistance in resolving E-Invoice process issues, demonstrating proficiency and dedication to ensuring operational excellence.
- Managed the migration of the E-Invoice module from Mfgpro to QAD 2022 environment, incorporating customized invoice programs and report designs to seamlessly transition and optimize functionality.

## Marvel Data Services LLP

Aug, 2018 - April, 2019

*Data Entry Operator*

Mumbai, India

- Worked on conversion of the Hard Copy Data to digital format, allowing data to be processed further for various applications.
- Assisted other teammates on the various conversion tasks.

---
