ABOUT ME

Experienced and passionate software engineer, dedicated to harnessing my expertise in software development to create cutting-edge and resilient solutions. Proficient in QAD ERP (NetUI/WebUI/MfgPro), Progress 4GL, Bash, Typescript, Git, and SDLC methodologies. Beyond technical proficiency, I bring strong problem-solving abilities and interpersonal skills to the table, enabling me to thrive under pressure, meet stringent deadlines, and consistently surpass client expectations.

PROFESSIONAL EXPERIENCE

Durvah IT Consulting Private Limited
Sr. Software Engineer

May 2024 - Present
Mumbai, India

- Delivered thorough QAD AUX training to team members and consistently supported team members with technical issues, promoting a collaborative atmosphere focused on sharing knowledge.
- Concurrently pursued advanced WebUI development training to stay ahead in technological advancements.

Key contributions in projects:

- Designed and developed customized business components with OOABL and Typescript for enhanced functionality.
- Successfully implemented the custom KPI and Action Center along with developing forms and views.
- Proficiently deployed various programs leveraging advanced tools like YAB and CVC, ensuring smooth implementation and seamless integration with existing systems.
- Designed and deployed multiple QRF programs leveraging Platform API to automate various transactions, resulting in a 60% reduction in manual effort and a substantial improvement in overall operational efficiency.
- Worked on the creation of OOABL Classes and Interfaces for QAD AUX App and performed the ant deployment in the environment.
- Executed development and integration workflows via SVN and provided technical support by troubleshooting Linux server issues.
- Led a team of developers, providing guidance, task allocation, and technical mentorship to ensure timely project delivery.

Aliter Business Solutions Private Limited
QAD Technical Consultant

Aug, 2021 - May, 2024
Mumbai, India

Key contributions in projects:

- Developed maintenance programs using Progress 4GL, precisely incorporating essential lookups to streamline operations and bolster efficiency.

- Orchestrated the implementation of customized QRF designs and proxy programs, empowering businesses to conduct thorough data analysis and make informed decisions with precision.
- Innovatively developed NetUI browses, seamlessly integrating browse links and URLs while optimizing browse performance to elevate user experience to new heights.
- Designed and deployed CIM and upload programs, significantly reducing manual workload by an impressive 50-60% and enhancing overall operational efficiency.
- Spearheaded seamless migrations from 2012 to 2016, adeptly resolving runtime issues and seamlessly replicating existing customizations in the latest version for uninterrupted workflow.
- Proficiently deployed various programs utilizing advanced tools like CVC and YAB, ensuring smooth implementation and seamless integration with existing systems.
- Interacted proficiently with Linux environments, harnessing CLI tools to streamline processes and optimize system performance.
- Designed business components and extended them with OOABL extensions and platform API, concurrently pursuing WebUI development training to stay at the forefront of technological advancements.
- Implemented lookups, formulas in the business component, and alerts, while effectively managing data export/import operations to ensure data integrity and seamless flow of information.
- Provided comprehensive QAD technical training to junior team members and actively assisted teammates with technical support, fostering a collaborative and knowledge-sharing environment.
- Offered invaluable assistance in resolving E-Invoice process issues, demonstrating proficiency and dedication to ensuring operational excellence.
- Managed the migration of the E-Invoice module from Mfgpro to QAD 2022 environment, incorporating customized invoice programs and report designs to seamlessly transition and optimize functionality.

Marvel Data Services LLP
Data Entry Operator

Aug, 2018 - April, 2019
Mumbai, India

- Worked on conversion of the Hard Copy Data to digital format, allowing data to be processed further for various applications.
- Assisted other teammates on the various conversion tasks.

SKILLS

- **Programming Languages:** Progress 4GL, OOABL, Python, Golang, Lua, Typescript, Bash, MySQL, Java.
- **Framework:** QAD Reporting Framework (QRF), Django, Flask, jQuery, Hugo, Springboot.
- **Environments:** QAD SE, QAD EE, QAD MfgPro, QAD AUX.
- **Dev Tools:** Linux, Unix, Git, Jira, Service Now, Vim/Vi, Tmux, Soap UI, Postman, Subversion.
