ABOUT ME

Experienced and passionate software engineer, dedicated to harnessing my expertise in software development to create cutting-edge and resilient solutions. Proficient in QAD ERP (NetUI/WebUI/MfgPro), Progress 4GL, Bash, Typescript, Git, and SDLC methodologies. Beyond technical proficiency, I bring strong problem-solving abilities and interpersonal skills to the table, enabling me to thrive under pressure, meet stringent deadlines, and consistently surpass client expectations.

EXPERIENCE

Durvah IT Consulting Private Limited **May 2024 - Present**

Sr. Software Engineer II

Mumbai, India

- Led a 5-person development team, delivering projects on schedule through technical guidance, task allocation, and mentorship.
- Delivered comprehensive QAD AUX training to team members and provided ongoing technical support to resolve development and implementation issues.
- Developed customized QAD business components using OOABL and TypeScript to extend system functionality and meet business requirements.
- Implemented custom KPI and Action Center functionality, including the development of forms and views.
- Developed and deployed programs using YAB and CVC, ensuring smooth implementation and integration with existing QAD environments.
- Designed and deployed multiple QRF programs using Platform API to automate business transactions, reducing manual effort by approximately 60% and improving operational efficiency.
- Developed OOABL classes and interfaces for QAD AUX applications and performed ANT-based deployments across environments.
- Worked with SVN for development and integration workflows, ensuring effective source code management and collaboration.
- Provided technical support and troubleshooting for Linux server environments, resolving issues to maintain application and system availability.

Aliter Business Solutions Private Limited

Aug, 2021 - May, 2024

QAD Technical Consultant

Mumbai, India

- Developed and customized QAD maintenance programs using Progress 4GL, including business lookups and process enhancements to improve operational efficiency.
- Designed and implemented customized QRF reports and proxy programs to support business reporting, data analysis, and decision-making.
- Developed QAD NetUI browses, including browse links and URLs, while optimizing browse performance and usability.
- Designed and deployed CIM and data upload programs, reducing manual effort by approximately 50–60% and improving operational efficiency.
- Led QAD migrations from 2012 to 2016, troubleshooting runtime issues and replicating existing customizations to ensure business continuity.
- Developed and deployed QAD programs using CVC and YAB, ensuring successful implementation and integration with existing systems.
- Worked extensively in Linux environments, using CLI tools to troubleshoot issues and streamline development and deployment activities.
- Designed and extended QAD business components using OOABL extensions and Platform API to deliver customized business functionality.
- Implemented lookups, formulas, alerts, and data import/export functionality within business components while maintaining data integrity.
- Provided technical training and support to junior team members, contributing to knowledge sharing and team development.
- Supported troubleshooting and resolution of E-Invoice process issues, ensuring smooth business operations.
- Managed the migration of the E-Invoice module from MfgPro to QAD 2022, including customized invoice programs and report designs.
- Collaborated with team members and business stakeholders to analyze requirements, troubleshoot issues, and deliver QAD technical solutions.

Marvel Data Services LLP

Aug, 2018 - April, 2019

Data Entry Operator

Mumbai, India

- Worked on conversion of the Hard Copy Data to digital format, allowing data to be processed further for various applications.
- Assisted other teammates on the various conversion tasks.
